

## **Certifikat genbrugs guld metal**

Vi bekræfter herved at alt vores ædelmetal i guld er såkaldt genbrugsmetal. Dette er gammelt metal der raffineres (renses) og genanvendes til produktion. Metallet er indhentet fra guldsmedeproduktioner, ure og dentalbranchen m.m. Metallet er ikke blevet tilsat nyt råmetal. Processen foregår i EU og overholder derved alle EU's regler for miljø, arbejdsforhold, børnearbejde m.m.

OECD's regler for konfliktguld

## **Certificate Recycled Gold metal**

We certify that the precious metal of gold from our stock is recycled metal. The material refined was sourced from the jewellery, watchmakers and dental industry. We confirm that no new raw material is used in the refining process. The refining takes place within the EU and respects therefore all laws on the environment, working conditions, child labor etc.
